PROFESSIONAL SUMMARY

Software Engineer and Flutter Developer transitioning to a QC Engineer role, with hands-on functional testing, REST API testing in Postman, and SQL database validation during development. Experienced in bug reproduction, re-testing fixes, authentication and authorization testing, and end-to-end workflows. Collaborates with backend teams to resolve API and data issues; understands regression, smoke, and sanity testing.

TECHNICAL SKILLS

Testing: Functional testing, API testing, bug reproduction, defect validation, re-testing, negative scenarios, unit testing, widget testing

QA knowledge: Regression testing, smoke testing, sanity testing, test cases, test scenarios

APIs and data: Postman, REST APIs, HTTP methods, status codes, JSON, authentication and authorization testing, SQL, database validation, Swagger/OpenAPI

Development: Flutter, Dart, BLoC, Clean Architecture, Git

PROFESSIONAL EXPERIENCE

Flutter Developer - NTG (National Technology Group)
Nov 2025 - Present | Damascus, Syria

- Develop and maintain two enterprise Flutter apps for Android and iOS: Self-Service HR and Recruitment, using Clean Architecture and BLoC.
- Perform functional testing of features and end-to-end flows, including validation rules, negative scenarios, and loading/error states.
- Test REST APIs in Postman, validating requests, responses, status codes, authentication, authorization, error handling, and edge cases.
- Use SQL to compare application and API results with database records; troubleshoot API and data issues with backend developers.
- Reproduce and investigate bugs, resolve defects, and re-test fixes to verify expected behavior before delivery.

PROJECTS

Lumina - Beauty & Wellness Booking App | Mar - Aug 2026

- Developed and tested authentication, search/filtering, bookings, rescheduling, payments, notifications, and Arabic/English flows. Validated API integrations, inputs, error states, and state behavior; implemented unit and widget tests.

Sportify - Stadium Booking App | Apr - Sep 2025

- Developed and tested player and stadium-owner workflows, REST API integration, form validation, error handling, deep links, payments, and role-specific flows.

Government Complaints App | Oct - Dec 2025

- Built and tested complaint submission and tracking; verified input validation, status changes, push notifications, and error scenarios.

EDUCATION

Bachelor's Degree in Software Engineering - Damascus University | 2026
Faculty of Information Technology

ADDITIONAL INFORMATION

Languages: Arabic (Native), English (Professional working proficiency)
Volunteer Leadership: Team leader and activity coordinator, Don Bosco Church
